

KIT PARA CAMIÓN Y MAQUINARIA PESADA, 98L

OilKontrol™
Environmental Spill Response Technology

OilKontrol is a compound of 100% natural and biodegradable organic fibers that act on any derivative of hydrocarbons, vegetable, mineral or animal oils, as well as some acids in all types of surfaces. It is a new non-toxic and inert product that acts much faster than most existing ones. After absorbing and encapsulating the spill, it is able to biodegrade the hydrocarbons through a process with bacteria.

The Truck And Heavy & Rolling Machinery Kit, designed for easy transportation, includes equipment and materials needed to rapidly and efficiently control small spills.

TRUCK AND HEAVY & ROLLING MACHINERY, 98L	AMOUNT
ULTRA RESISTANT WASHABLE PVC BAG	1
ABSORBENT ORGANIC FIBER BAG (7KG bag)	1 bag
ABSORBENT CUSHION	2 cushions
ABSORBENT BARRIER OF 2.5M	1 barriers
PAIR OF NITRILE GLOVES	2 pairs
WASTE BAGS	2 bags
PLASTIC SHOVEL WITH RUBBER TIP	1 shovel
PLASTIC BROOM FOR MANUAL RECOLLECTION	1 broom
RESPIRATORY MASK	1 mask
DISPOSABLE OVERALL	1 overall
PROTECTION GOGGLES	1 pair

Product datasheet

- Appearance: blue-greenish fiber
- Specific weight: 0.20-0.22 N / m³
- Inflammable point: 280 - 290° C; combustion (moist). Not flammable
- Chemical resistance to oils, fats, hydrocarbons, solvents, Cl₂Ca, salt
- Humidity: 5%
- Ash content: 4%
- Specific gravity: 0.8 / 0.9
- Inert material: 0.5%
- PH: 7 (neutral)
- Absorption capacity per kit: up to 98 liters

Uses

- Industrial equipment maintenance.
- Fuel storages.
- Tank cars.
- Mining.
- Companies in charge of hydrocarbons transfer facilities, or harmful liquid pollutant substances, whether they are owners or concessionaires.
- Farmlands that store fuels and harmful substances.
- Waste management service companies.

Advantages

- Easy to transport to risk points, it has the elements to control and absorb all types of spills. In addition, it includes personal protection material.
- OilKontrol is a natural biodegradable product, non-toxic before use.
- It has a great speed of hydrocarbons absorption.
- It allows the reuse of contaminated soil.
- It is resistant to a wide range of substances such as oils, greases, hydrocarbons, solvents, salts, among others.
- It absorbs spills of acids, hydrocarbons or vegetable oils that contaminate the soil and water.

Empaquetado y almacenamiento

The amount of OilKontrol included in the kit has an absorption capacity of 98 liters. It has been designed for all types of weather conditions (snow, rain, etc.).

Consideraciones

- Like any other material with polyester, the hazardous product has to be disposed of by incineration for total elimination. It has a high caloric content and generates very little ash residue.
- We recommend abiding by the applicable environmental regulations. Check product datasheet before use.
